## DC 18V uninterruptible power supply box

What is a 12V uninterruptible power supply?

This is a simple and fully automatic, 12V uninterruptible power supply system for small/medium power appliances. This power supply specifically designs to drive routers and modems to provide uninterrupted internet and telephone services in areas affected by frequent power failures.

How does an uninterruptible power supply work?

The uninterruptible power supplies have e.g. an adjustable maximum buffer time to protect the battery and the unit protects the battery from going into a deep discharge. Draining the battery all the way down can damage it in a very short period of time, especially if this occurs multiple times.

Are 18 VDC power supplies available at Mouser Electronics?

Tariff may apply to this part if shipping to the United States. Tariff may apply to this part if shipping to the United States. Tariff may apply to this part if shipping to the United States. 18 VDC Power Supplies are available at Mouser Electronics. Mouser offers inventory, pricing, & datasheets for 18 VDC Power Supplies.

What is a DC-UPS with external batteries?

The DC-UPS with external VRLA batteries feature the PULS" 1-Battery-Concept: This means each battery is individually charged and monitored, which avoids the need for matched batteries and ensures longest battery life. What is a UPS module? UPS is the short version of "uninterruptible power supply".

View our datasheet of AC-DC single output linear regulated power supplies. Models with outputs ranging from 1.5 to 200 volts are available.

Discover the DC UPS-18W - VSharp UPS, your ultimate power backup. With a built-in lithium battery, enjoy uninterrupted power and automatic startup upon adapter connection. Rest easy with auto ...
