Can a portable power station be used as an uninterruptible power supply?

Many shoppers may want to use a portable power station as an uninterruptible power supply or UPS. A true UPS needs to be able to kick in and take over automatically when a power outage occurs,and not all power stations have UPS capability.

Do you need a portable power station?

When power's not around,you need a power station. The best portable power stations give you enough juice to run what you need to run and charge what you need to charge,without fuel,without fumes and without fuss. A portable power station is essentially a collection of large rechargeable batteries connected to controls and a series of ports.

What is a portable power station?

A portable power station is essentially a collection of large rechargeable batteries connected to controls and a series of ports. You charge a portable power station as you would any rechargeable battery,by plugging it into a wall socket or other power source. Compared to a small power bank,a portable power station holds much more power.
