
Hungary's solar system

How much solar energy does Hungary produce?

Data from transmission system operator MAVIR shows that solar energy production in Hungary reached a new peak on June 13, producing enough energy to serve the country's domestic electricity requirements entirely from renewables. Hungary has deployed almost 8 GW of solar capacity, according to the country's deputy minister of energy, Gábor Czepek.

Does Hungary have a solar system?

Hungary has also made significant progress in residential solar installations, aiming to add 1 GW of capacity by the end of 2026. The government is providing financial support through 90% non-refundable grants for households to install solar panels.

How has Hungarian solar energy changed over the years?

The residential solar capacity grew from 2.3 GW at the end of 2024 to 2.4 GW by March 2025. This growth was facilitated by the removal of restrictions on new grid connections for residential solar systems. The Hungarian government has been actively working to promote solar energy through various regulatory changes.

How is Hungarian government promoting solar energy?

The Hungarian government has been actively working to promote solar energy through various regulatory changes. In February 2024, it launched a support scheme to encourage small and medium-sized enterprises (SMEs) to invest in solar energy.

Hungary's solar capacity is projected to exceed 8 GW by 2025, fueled by major projects and residential solar panel growth. Learn about the policies driving this boom.

Hungary announces HUF 100 billion (EUR 261 million) residential energy storage subsidy program, providing HUF 2.5 million per household to purchase 10kWh energy storage ...
