
Mobile high-power solar panels

Are portable solar panels more mobile?

Some portable solar panels are more mobile than others. The panels that can produce the amount of electricity that you need to power many devices and/or appliances are generally quite large—at least a few feet across and a foot or two high: A larger panel allows you to absorb more energy.

Are portable solar panels compatible with my portable power station?

There are two specs to check for when looking to see if your portable solar panel is compatible with your portable power station: power potential and connector/port compatibility. Portable solar panels aren't all that smart. Whatever blast of sun they are getting will be transmitted directly as power to your power station.

Are portable solar panels smart?

Portable solar panels aren't all that smart. Whatever blast of sun they are getting will be transmitted directly as power to your power station. So before you purchase a portable solar panel, first look at your power station to see how much solar input it can handle. (This is typically found in very small font on the bottom of your power station).
