
Slovenia more than a dozen solar panels

How many solar power plants are there in Slovenia?

In 2022, 12,698 solar power plants with a total capacity of 227.6 megawatts (MW) were connected to the grid in Slovenia and 18,034 solar power plants with a total capacity of 411.8 MW in 2023. In total, 49,092 solar power plants with a total capacity of 1,104.5 MW were in the system on 31 December 2023.

How much will Slovenia spend on solar energy?

Slovenia has set aside EUR16 million (\$16.7 million) to support solar energy communities, requiring projects to include at least 100 kW of PV capacity, with or without storage. The program will run until 2027.

How much solar power will Slovenia have by 2030?

In its report, issued a month ago, SolarPower Europe estimated that Slovenia could reach 6.2 GW in total solar power capacity by 2030. Of note, a record 55.9 GW was installed in Europe last year, 40% more than in 2022. The boom in photovoltaics is evident throughout the planet.

Did two Slovenian companies misrepresent a solar project to get EU funds?

The European Public Prosecutor's Office (EPPO) is investigating a EUR340,000 (\$349,350) fraudulent scheme allegedly involving two Slovenian companies accused of misrepresenting a solar project to obtain EU funds.

A Symbol of Sustainable Development The 30 MW solar power plant is more than just an energy project--it's a symbol of Slovenia's dedication to sustainable development. By ...

For those inspired by these large-scale projects and interested in the technology that makes them possible, a deeper dive into the world of solar energy can be incredibly ...

The tender targets the installation of solar panels on parking areas and construction sites owned by municipalities or the state, signaling a broad approach to harnessing solar ...

Slovenian energy company is moving forward with a 140 MW floating solar project, which could become the largest in both Slovenia and Europe.

In its report, issued a month ago, SolarPower Europe estimated that Slovenia could reach 6.2 GW in total solar power capacity by 2030. Of note, a record 55.9 GW was ...

Slovenia has opened a EUR29 million (\$33.7 million) call under the European Union's Modernisation Fund to support priority solar and wind projects, with applications due by Jan. 7, ...

In its report, issued a month ago, SolarPower Europe estimated that Slovenia could reach 6.2 GW in total solar power capacity by 2030. Of note, a record 55.9 GW was installed in Europe last year, 40% ...

New buildings with a roof area over 1,000 square metres and new car parks with a surface area exceeding that size will as a rule have to have solar panels installed under new ...
