
Solar glass courtyard roof

Are courtyards roofed?

However, in Hebei, China, local buildings are showing an evolution trend characterized by the courtyards being roofed (CBR). This spontaneous evolution presents the diversity of CBR technologies (CBRTs), including light-transmitting CBRTs (T-CBRTs) and non-light-transmitting CBRTs (NT-CBRTs).

How can a glazed roof reduce energy consumption in a courtyard building?

Moreover, Chi, Xu and Peng reduced the energy consumption of a courtyard building by 23% through installing a glazed roof unit on the courtyard and introducing a river-air source heat pump.

What is a courtyard building?

Courtyard building is an important type of vernacular architecture, widely distributed in different climate zones around the world. Traditionally, courtyards are characterized by opening to the sky, providing buffer spaces for ventilation and light for the surrounding buildings.

Can a skylight increase air temperature in a courtyard?

Che, Cao, Shi and Yu found that the air temperature in the courtyard in winter can be increased by 20% with the top closed skylight, and in the summer, the skylight can be opened to reduce the average temperature by 1.2 °C.
