
Where are the large energy storage cabinet wholesalers in the EU

How many residential energy storage systems are there in Germany?

By September 2023, Germany has installed more than 1 million residential energy storage systems and expects to add more than 400,000 units per year in the future. Volatile energy prices and the popularity of photovoltaic self-use have driven demand for residential energy storage, which is expected to continue to grow through 2030.

Which country is promoting the development of residential energy storage?

In terms of residential energy storage, the Polish government has launched Moj PRD 5.0 subsidy program to encourage the development of residential energy storage. Sweden's installed battery storage capacity is expected to grow from 503 MW in 2023 to 3.8 GW in 2030, with high revenue levels in the ancillary services market driving the market growth.

What is Italy's energy storage capacity in 2023?

Italy's installed energy storage capacity in 2023 is 3.9 GW, and is expected to increase to 18 GW by 2030, mainly in the pre-table energy storage and household storage markets.
